📄 PROFILE

BTech graduate with hands-on experience in building full-stack and AI-driven solutions. I've developed end-to-end products, including a freelance marketplace platform and mobile apps using Flutter, Node.js, PostgreSQL, and Supabase. With a strong interest in AI, automation, and scalable system design—combined with leadership experience as GDSC Chief of Operations—I bring technical depth, adaptability, and a drive to create impactful, user-focused products.

🏠 ORGANIZATIONS

Orange Business Services 🔗

Data/AI Intern

January 2026 – June 2026 | Gurugram

- Built an AI-powered Outlook Automation System leveraging Python, Outlook APIs, and LLMs for intelligent email routing and workflow automation.
- Worked on Data & AI use cases, applying analytics and automation to solve real-world business problems.

Satori Group India 🔗

Intern

May 2024 – July 2024 | Mumbai

Worked on different database. Worked on how Teradata and SQL work

- Applying efficient data analysis methodologies.
- Importance of Data Sanitization
- Real world-projects and working collaboratively in a team
- Successfully cleared the ACDA (ACL Certified Data Analyst) Level 3 examination.

🎓 EDUCATION

Class X

Udayachal High School

2019 – 2020

Percentage: 92.20%

Computer Engineering

NMIMS University, Mukesh Patel School of Technology Management & Engineering, NMIMS

2020 – 2026

Diploma in Computer Engineering CGPA: 2.93/4

BTech in Computer Engineering CGPA: 2.88/4

🧠 SKILLS

Technical Skills:

Programming Languages: Python, Java, C++,

Libraries & Frameworks: Pandas, NumPy, Matplotlib

Tools: Tableau, AutoCAD, Android Studio, Canva, Microsoft Office, Antigravity

Soft Skills:

Analytical, Interpersonal, Proactive, Team Work, Leadership, Adaptability, Problem-Solving

Other

Socket.IO, WebXR, Cloudinary, Outlook

📁 PROJECTS

AI-Powered Outlook Mail Router

Developed an autonomous email routing system using Python, integrating Microsoft Outlook, local LLMs, and a responsive frontend to enable zero-touch inbox management. Implemented intelligent AI workflows for automatic email categorization, calendar conflict resolution, extraction of action items into Outlook Tasks, and generation of context-aware reply drafts, showcasing strong expertise in AI-driven automation and system integration.

LogiQuote AI

Built an AI-powered system that converts unstructured cargo shipping emails into structured ERP-ready quotation drafts. Engineered a multi-provider LLM orchestration layer supporting 7 AI backends (Groq, OpenAI, Anthropic, Gemini, NVIDIA NIM, Ollama) with hot-swappable model switching. Extracts and validates 20+ logistics fields in under 2 seconds using Next.js, TypeScript, and Zod schema validation, showcasing expertise in building end-to-end AI solutions.

Freelance Marketplace Platform (Capstone Project) 🔗

Built a full-stack freelance marketplace with job posting, bidding, secure payments, real-time chat, and ratings. Implemented RBAC authentication, admin controls, and media uploads using React, Node.js, PostgreSQL (Supabase), and Socket.IO. Delivered a scalable, production-ready platform with clean UI and cloud deployment.

Chat bot

Crafted an intelligent chat bot using a pre-existing training model, seamlessly integrating Replit and Hugging Face. Demonstrates proficiency in AI implementation for interactive conversations.
